3

Begin by removing the plastic cover from the cross member. The points indicated in the image must all be pushed in to remove the cover.

4

Lift the skid up into place and loosely install the M8 bolts and 5/16" washers in the front of the skid. If installing our engine skid, slip it between the engine skid and the frame.

5

To secure the back side of the skid, place the spacers on top of the skid with the flange towards the front.

6

Insert the 1/2" carriage bolt up through the skid and frame from the bottom. On the top side of the cross member, stack the provided square washer, 7/16" washer and nylock nut in that order.
