Step 2 Mounting the Ladder

Start by mounting the ladder to the outside edge of the left carrier. Simply insert the 3/8"-16 serr. flange nuts into the cutouts in the inside of the adventure carrier and hold them over the holes on the inside of the carrier and thread the 3/8"-16 X 3/4" button head bolts through the holes in the right side of the ladder and the left side of the carrier and into the nuts

Step 3 Mounting the Step

To finish the assembly, bolt the bottom step into the holes in the arm of the carrier, underneath the ladder using the 3/8"-16 X 3/4" button head bolts on the outside and of the carrier and the 3/8"-16 serr. flange nuts on the inside.

**Step 4** Final Check

Double check all bolts are tight and **enjoy!**
