5

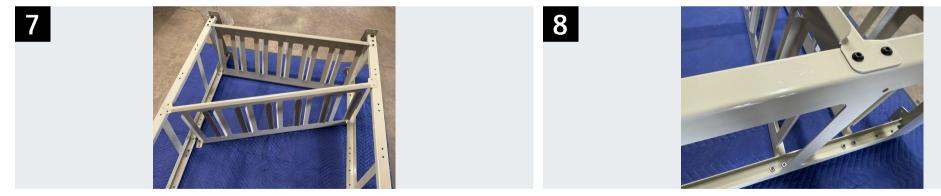

Ensure that the front shelf flange is aligned with the front of the rack. The angle of the shelf should be parallel to the angle of the cutouts in the rack upright. Internal forced flanges should face up.

6

Install opposite side rack upright into existing shelf/upright assembly, install bolts and nuts, leaving them slightly snug.

Install second shelf by angling it into the rack assembly.

Install hardware at all 4x attachment points on shelf and slightly snug.

Repeat steps used to install second shelf on the remaining 4x shelves.

12

Use a framing square to check that the rack is square at each corner. Once this is verified. Beginning tightening all of the fasteners on the front of the rack.

Install all 4 swivel casters onto mounting pads located on the bottoms of the rack uprights.

Once casters are all tight, lock them to assist in standing the entire rack assembly up.
