Step 1 Roof Rack Awning Mount Install Instructions

Step by step on how to install the Victory 4x4 Roof Rack Awning & Accessory Mount. The mounts are sold in pairs and bolt to the side channel of the roof rack crossbars. Please read all steps carefully before starting the install. The video shows an earlier version of the bracket. The mounting process is the same.

Tools needed: 5/32" Allen wrench, tape measure.

Step 2 Included Parts

Check that you have both awning mounts shown before starting. The awning is not included.

Step 3 Included Hardware

Check that you have all of the hardware shown before starting:

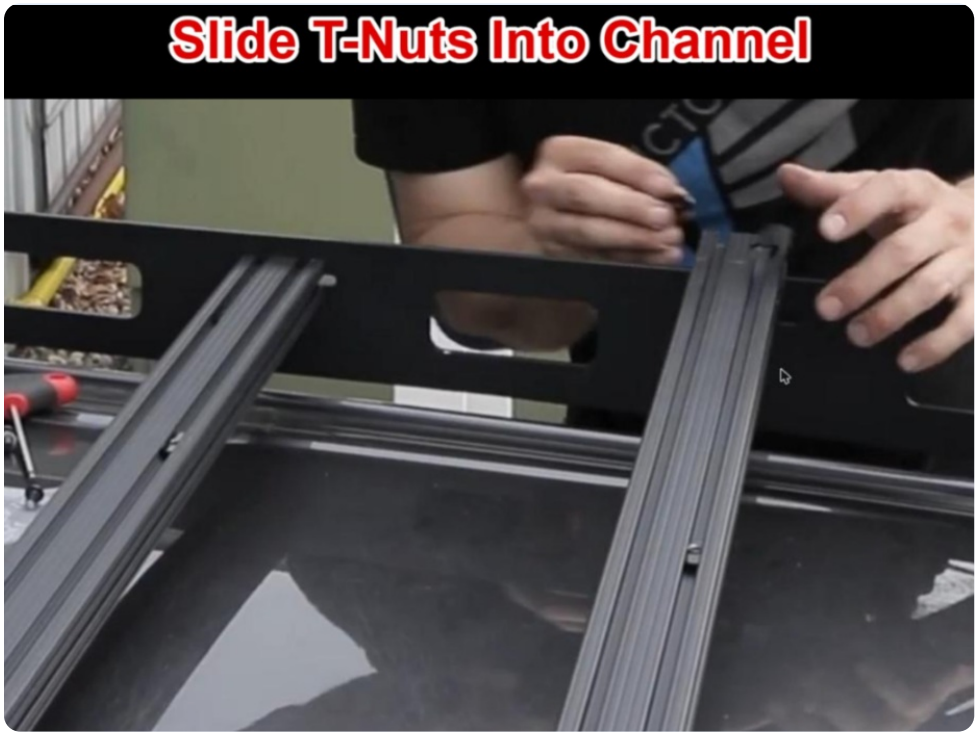

- T-nuts for the crossbar side channel
- 1/4"-20 x 3/8" button head bolts (5/32" Allen)

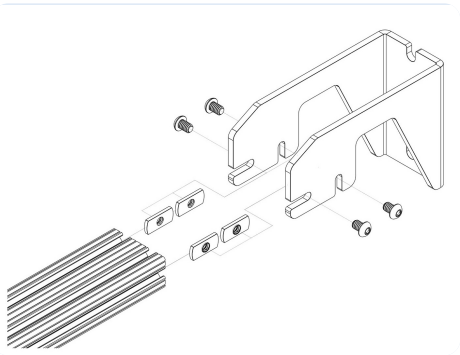

Step 4 Remove the Crossbar End Bolts

Pick the crossbar where you want the first mount. With a 5/32" Allen wrench, remove the two bolts that hold that end of the crossbar to the side rail.
If anything is loaded on that crossbar, be careful that it does not drop when the bolts come out.
Video timestamp: 5:10

Step 5 Slide In the T-Nuts

Lift the end of the crossbar up just enough to open the side channel.
Slide the T-nuts into the channel on the side of the crossbar, two on each side, with the flange facing up.
Video timestamp: 5:33

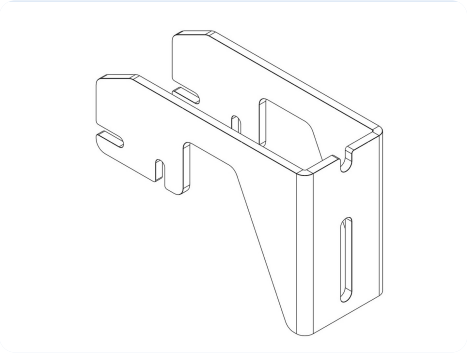

Step 6 Reinstall the Crossbar Bolts

Drop the crossbar back down into place and reinstall the two end bolts with the 5/32" Allen wrench.
Video timestamp: 5:56

Step 7 Bolt On the Awning Mount

Set the awning mount over the crossbar and line it up with the T-nuts. Start the 1/4"-20 x 3/8" button head bolts by hand.
The T-nuts can still slide in the channel, so move them as needed to line everything up. Set the bracket down and in against the crossbar.
Video timestamp: 6:08

Step 8 Tighten and Install the Second Mount

Once the mount is where you want it, tighten the bolts with the 5/32" Allen wrench.
Measure your awning (or whatever you are mounting) to find the spacing for the second mount. Install it on another crossbar the same way.
Video timestamp: 6:55

Step 9 Installation Complete

Confirm all hardware is tightened. Congrats! Your installation of the Roof Rack Awning Mount is now complete. Enjoy!
