1

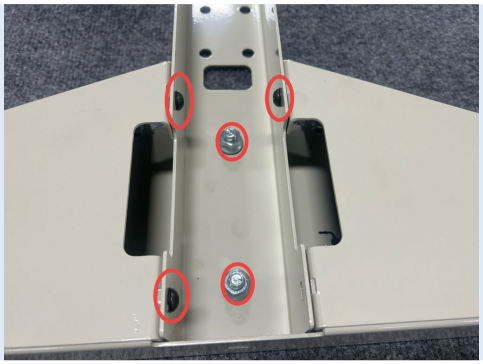

Install (4) wheels on triangle bases as shown above.

2

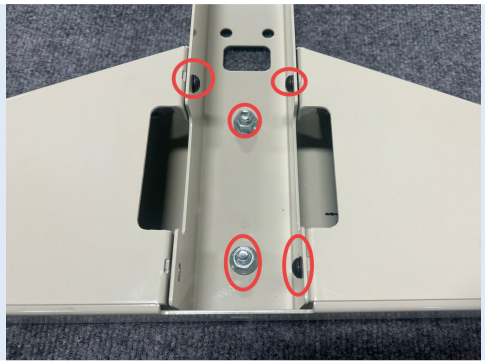

Using the 1/4"-20 black button heads, washers, and flange nuts, loosely install the four corner covers as shown above.

3

Assemble and upright into a base as shown using the 3/8"-16 Carriage bolt, square washers and nuts, and 1/4"-20 black button heads, washers and nuts. Be sure to leave the bottom right hardware out for a later step.

4

Repeat with other side upright. Be sure to leave out the lower left piece of hardware on this side for the next step.

5

Loosely assemble the lower cross member as shown above.

6

With all of your hardware loosely started, tighten all base hardware.

7

Remove corner caps on white board and install to base using supplied #5-40 screws, washers and nuts. Reinstall corner caps after hardware is tight.

8

With remaining 3/8"-16 hardware, install the stack rack panel below white board.

9 Place stack rack accessories in desired configuration and deploy the board to the Gemba!
